Contents for Volume 151

Number 1, 7 July 1991

MARCHUK, G. I., PETROV, R. V., ROMANYUKHA, A. A. and BOCHAROV, G. A., Mathematical Model of Antiviral Immune Response. I. Data Analysis, Generalized Picture Construction and Parameters Evaluation for Hepatitis B 1

MARCHUK, G. I., ROMANYUKHA, A. A. and BOCHAROV, G. A., Mathematical Model of Antiviral Immune Response. II. Parameters Identification for Acute Viral Hepatitis B 41

TCHURAEV, R. N., A New Method for the Analysis of the Dynamics of the Molecular Genetic Control Systems. I. Description of the Method of Generalized Threshold Models 71

PROKUDINA, E. I., VALEEV, R. Y. and TCHURAEV, R. N., A New Method for the Analysis of the Dynamics of the Molecular Genetic Control Systems. II. Application of the Method of Generalized Threshold Models in the Investigation of Concrete Genetic Systems 89

OLSSON, P. G., HAMMARSTRÖM, L. and SMITH, C. I. E., Antigenicity of Mouse Monoclonal Antibodies. A Study on the Variable Region of the Heavy Chain 111

HAHN, B. D., Photosynthesis and Photorespiration: Modelling the Essentials 123

LETTER TO THE EDITOR

SCHREIMAYER, W. and WALLER, M., Domain Specialization in Voltage-dependent Na^+ and Ca^{2+} Channels 141

Number 2, 21 July 1991

MOTRO, U., Co-operation and Defection: Playing the Field and the ESS 145

BETTS, G. F. and SRIVASTAVA, D. K., The Rationalization of High Enzyme Concentration in Metabolic Pathways Such as Glycolysis . . . 155

MANNIE, M. D., A Unified Model for T Cell Antigen Recognition and Thymic Selection of the T Cell Repertoire 169

SHUMAKER, J. M., CLARK, J. W. and GILES, W. R., A Model of the Phase-sensitivity of the Pacemaking Cell in the Bullfrog Heart . . . 193

Duszyk, M. and French, A. S., An Analytical Model of Ionic Movements in Airway Epithelial Cells 231

Heinrich, R. and Hoffmann, E., Kinetic Parameters of Enzymatic Reactions in States of Maximal Activity: An Evolutionary Approach . . . 249

Letter to the Editor

Morel, J. E., The Isometric Force Exerted per Myosin Head in a Muscle Fibre is 8 pN. Consequence on the Validity of the Traditional Concepts of Force Generation 285

Number 3, 7 August 1991

Almirantis, Y. and Papageorgiou, S., Cross-diffusion Effects on Chemical and Biological Pattern Formation 289

Spungin, B., On the Temporo-spatial Array of Dynein Activity in the Ciliary Axoneme 313

Tsonis, A. A., Elsner, J. B. and Tsonis, P. A., Periodicity in DNA Coding Sequences: Implications in Gene Evolution 323

Yan, J. F., Yan, A. K. and Yan, B. C., Prime Numbers and the Amino Acid Code: Analogy in Coding Properties 333

Heinrich, R. and Reder, C., Metabolic Control Analysis of Relaxation Processes 343

Holliday, R., Quantitative Genetic Variation and Developmental Clocks 351

Herrick, J. and Bensimon, D., Gene Regulation Under Growth Conditions. A Model for the Regulation of Initiation of Replication in *Escherichia coli* 359

Hovorka, R. and Hilgertova, J., Identification of Insulin Receptor Systems: Assessing the Impact of Model Selection and Measurement Error on Precision of Parameter Estimates using Monte Carlo Study . . 367

Singer, D. F. and Linderman, J. J., Antigen Processing and Presentation: How Can a Foreign Antigen be Recognized in a Sea of Self Proteins? 385

Dibb, N. J., Proto-splice Site Model of Intron Origin 405

Exley, C., Chappell, J. S. and Birchall, J. D., A Mechanism for Acute Aluminium Toxicity in Fish 417

Letter to the Editor

Strazewski, P., Psoralen Mutagenesis by Transient Misalignment? 429

Number 4, 21 August 1991

SHINODA, T., SHIMA, N. and TSUKADA, M., Electronic Structure of DNA by *DV-Xα* Cluster Calculations. I. d(GG) · d(CC), $d(CG)_2$, $d(GC)_2$ *A* and *B* Conformations 433

SERENO, M. I., Four Analogies Between Biological and Cultural/Linguistic Evolution 467

SAVAGEAU, M. A., Biochemical Systems Theory: Operational Differences Among Variant Representations and their Significance 509

LAHAV, N., Prebiotic Co-evolution of Self-replication and Translation or RNA World? 531

HAVSTEEN, B. H., A Stochastic Attractor Participates in Chymotrypsin Catalysis. A New Facet of Enzyme Catalysis 557

ERRATUM 573

Index to Volume 151

Airway epithelial cells, an analytical model of ionic movements in, 231
ALMIRANTIS, Y. and PAPAGEORGIOU, S., Cross-diffusion effects on chemical and biological pattern formation, 289
Aluminium toxicity, acute, in fish, a mechanism for, 417
Amino acid code and prime numbers: analogy in coding properties, 333
Antigen processing and presentation: how can a foreign antigen be recognized in a sea of self proteins?, 385
Antigen recognition, T cell, and thymic selection of the T cell repertoire, a unified model for, 169
Antigenicity of mouse monoclonal antobodies. A study on the variable region of the heavy chain, 111
Antiviral immune response, mathematical model; hepatitis B, 1, 41
Attractor, stochastic, participates in chymotrypsin catalysis; a new facet of enzyme catalysis, 557
Axoneme, ciliary, on the temporo-spatial array of dynein activity in, 313

BENSIMON, D. (see HERRICK, J.), 359
BETTS, G. F. and SRIVASTAVA, D. K., The rationalization of high enzyme concentration in metabolic pathways such as glycolysis, 155
Biochemical systems theory: operational differences among variant representations and their significance, 509
Biological and chemical pattern formation, cross-diffusion effects on, 289
Biological and cultural/linguistic evolution, four analogies between, 467
BIRCHALL, J. D. (see EXLEY, C.), 417
BOCHAROV, G. A. (see MARCHUK, G. I.), 1, 41
Bullfrog heart, a model of the phase-sensitivity of the pacemaking cell in, 193

Ca^{2+} and Na^{+} channels, voltage-dependent, domain specialization in (letter), 141
Catalysis, chymotrypsin, a stochastic attractor participates in; a new facet of enzyme catalysis, 557
Cells, epithelial, airway, an analytical model of ionic movements in, 231
Cell, pacemaking, in the bullfrog heart, a model of the phase-sensitivity of, 193
Channels, Na^{+} and Ca^{2+}, voltage-dependent, domain specialization in (letter), 141
CHAPPELL, J. S. (see EXLEY, C.), 417
Chemical and biological pattern formation, cross-diffusion effects on, 289
Chymotrypsin catalysis, a stochastic attractor participates in; a new facet of enzyme catalysis, 557
Ciliary axoneme, on the temporo-spatial array of dynein activity in, 313
CLARK, J. W. (see SHUMAKER, J. M.), 193
Clocks, developmental, quantitative genetic variation and, 351
Code, amino acid, and prime numbers; analogy in coding properties, 333
Coding sequences, DNA, periodicity in; implications in gene evolution, 323
Co-evolution, prebiotic, of self-replication and translation or RNA world?, 531
Control, metabolic, of relaxation processes, 343
Control systems, genetic, molecular, a new method for the analysis of the dynamics of, 71, 89
Co-operation and defection: playing the field and the ESS, 145

Cross-diffusion effects on chemical and biological pattern formation, 289
Cultural/linguistic and biological evolution, four analogies between, 467

Defection and co-operation: playing the field and the ESS, 145
Developmental clocks, quantitative genetic variation and, 351
DIBB, N. J., Proto-splice site model of intron origin, 405
DNA coding sequences, periodicity in; implications in gene evolution, 323
DNA electronic structure by *DV-Xα* cluster calculations. d(GG) · d(CC), $d(CG)_2$, $d(GC)_2$ *A* and *B* conformations, 433
Domain specialization in voltage-dependent Na^+ and Ca^{2+} channels (letter), 141
DUSZYK, M. and FRENCH, A. S., An analytical model of ionic movements in airway epithelial cells, 231
Dynamics of the molecular genetic control systems, a new method for analysis, 71, 89
Dynein activity in the ciliary axoneme, on the temporo-spatial array of, 313

Electronic structure of DNA by *DV-Xα* cluster calculations; d(GG) · d(CC), $d(CG)_2$, $d(GC)_2$ *A* and *B* conformations, 433
ELSNER, J. B. (see TSONIS, A. A.), 323
Enzymatic reactions in states of maximal activity, kinetic parameters of; an evolutionary approach, 249
Enzyme catalysis, a new facet; a stochastic attractor participates in chymotrypsin catalysis, 557
Enzyme concentration, high, in metabolic pathways such as glycolysis, the rationalization of, 155
Epithelial cells, airway, an analytical model of ionic movements in, 231
Erratum, 573
Escherichia coli, a model for the regulation of initiation of replication in, 359
ESS; playing the field; co-operation and defection, 145
Evolution, biological and cultural/lunguistic, four analogies between, 467
Evolution, gene; implications of periodicity in DNA coding sequences, 323
Evolutionary approach to kinetic parameters of enzymatic reactions in states of maximal activity, 249
EXLEY, C., CHAPPELL, J. S. and BIRCHALL, J. D., A mechanism for acute aluminium toxicity in fish, 417

Fish, a mechanism for acute aluminium toxicity in, 417
Force, isometric, exerted per myosin head in a muscle fibre is 8 pN. Consequence on the validity of the traditional concepts of force generation (letter), 285
FRENCH, A. S. (see DUSZYK, M.), 231

GABRIEL, J. L. and HOOBER, J. K., Molecular modeling of phytochrome, 541
Gene evolution: implications of periodicity in DNA coding sequences, 323
Gene regulation under growth conditions. A model for the regulation of initiation of replication in *Escherichia coli*, 359
Generalized threshold models; a new method for the analysis of dynamics of the molecular genetic control systems, 71, 89
Genetic molecular control systems, a new method for analysis of the dynamics of, 71, 89
Genetic variation, quantitative, and developmental clocks, 351
GILES, W. R. (see SHUMAKER, J. M.), 193
Glycolysis, the rationalization of high enzyme concentration in metabolic pathways such as, 155

HAHN, B. D., Photosynthesis and photorespiration: modelling the essentials, 123
HAMMARSTRÖM, L. (see OLSSON, P. G.), 111

HAVSTEEN, B. H., A stochastic attractor participates in chymotrypsin catalysis. A new facet of enzyme catalysis, 557
Heart, bullfrog, a model of the phase-sensitivity of the pacemaking cell in, 193
Heavy chain variable region: antigenicity of mouse monoclonal antibodies, 111
HEINRICH, R. and HOFFMANN, E., Kinetic parameters of enzymatic reactions in states of maximal activity: an evolutionary approach, 249
HEINRICH, R. and REDER, C., Metabolic control analysis of relaxation processes, 343
